Exchange ActiveSync
Windows Phone 7 Configuration Guide

This document describes how to configure Windows Phone 7 to connect to a MailEnable ActiveSync server.

1 Windows Phone 7

1.1 Add a New Account

1. Open the *Settings* application.
2. Touch *Email and Accounts*.
3. Touch *Add an Account*.
4. Touch *Outlook*.
5. Proceed to the next section (0) to configure an ActiveSync account.

1.2 Configure an ActiveSync Account

6. Enter your email address and the password for your MailEnable email account.
7. Touch *Sign In* button.
8. If the *Advanced Setup* button appears, touch it, and:
    a. Enter your email address in the *Email address* field.
    b. Enter the password for your MailEnable email account in the *Password* field.
    c. Enter your MailEnable email account login name in the *User name* field (this is the part of your email address which is before the @ symbol).
    a. Enter your postoffice in the *Domain* field (this is probably the part of your email address which is after the @ symbol, possibly without any suffixes).
    b. Enter the address of your MailEnable ActiveSync server in the *Server* field.
    c. Touch *Sign In* button.
2. Touch the *OK* button.
